DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6, 9, 16-18, 22-23, 30-31, 33, are rejected under 35 U.S.C. 102(b) as being anticipated by Christensen (US Patent No 3299496).

Regarding claims 1, 6, 9, 16, 30-31, 33, Christensen discloses an apparatus for assembling hoses comprising a moveable frame (20, 36); a first gripper assembly (30) and a second gripper assembly (16) connected to the frame including gripper jaws to grip a hose; an actuator (46, 36) assembly connected to the first gripper assembly (30) for moving the first gripper toward the second gripper to insert a tubes/hoses (Figures 1 & 2, column 1, line 55+). In further regards to claims 30-31 & 33 the method as claimed is inherently performed during normal operation of the apparatus disclosed by Christensen (see MPEP 2112.02).

Regarding claims 2, & 17, Christensen discloses the first gripper (30) is moveable relative to the frame (20), and the second gripper (16) is fixed relative to the frame (Figures 1 & 2).

Regarding claims 3, 18, 22-23, Christensen discloses the frame includes a slide guide (28); the first gripper (30) is slidably mounted on the guide (28); and the actuator (46) includes a ram connected to the first gripper for sliding the first gripper on the slide guide (column 1, line 60-73).

Art Unit: 3726

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7-8, 21, & 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Christensen in view of Menguc (US Patent No 6311378).

Christensen discloses the claimed invention except for the use of a counterbalance & suspending the frame from said counterbalance.

Menguc discloses an assembly device comprising a counterbalance (112) for suspending a work-tool (100, 40) therefrom so that a human operator can move the frame/tool about without supporting the weight of the frame (100). The horizontal orientation of the assembly tool is merely design choice, as it would be readily apparent to an artisan of ordinary skill to orient the tool in various ways to accommodate a given hose configuration. The use of such an overhead counterbalance configuration is advantageous in that it reduces fatigue amongst the tool operators (column 3, lines 46-52). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to form a hose assembly as disclosed by Christensen while employing a counterbalance as taught by Menguc in order to relieve the fatigue of tool operators.

Application/Control Number: 10/648,839

Art Unit: 3726

Allowable Subject Matter

Claims 4-5, 10-15, 19-20, 24-29, 34-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record on the attached PTO-892, and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J Kenny whose telephone number is 703-306-0359. The examiner can normally be reached on mon - fri 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 703-308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
